

Manual for the VirtualVizor®

1. Watch the tutorial-video on www.VirtualVizor.com

2. Download & start a VR-app from www.virtualvizor.com/apps or from any app store (search for "vr" or "cardboard").

3. To remove the VirtualVizor® (=VV®) from the DVD-case lift the right lens to 45° (1) with your left thumb & press the release button (2). To unfold the VV® hold down the front part with your right thumb (3) & lift the right lens to 90° (4) until the display-divider (5) flips open automatically (6) ...

4. ... & locks in at 90° (7). The VV® fits any smartphone size in 4 adjustable degrees from slot 1. (=small) to 4. (=big) & is preset to slot 3.. To adjust to other sizes, loosen the press-button (8), hook the rubber band into another slot & lock the press-button:

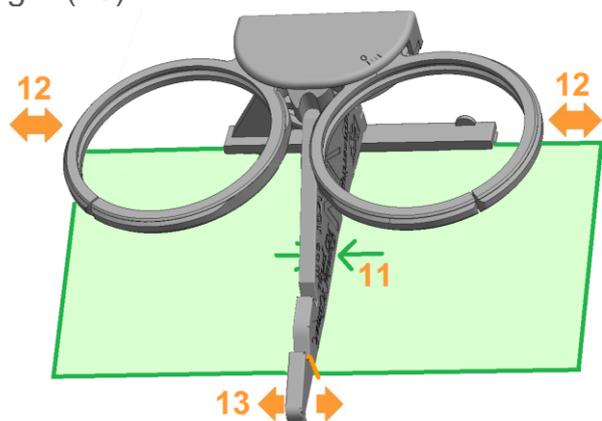

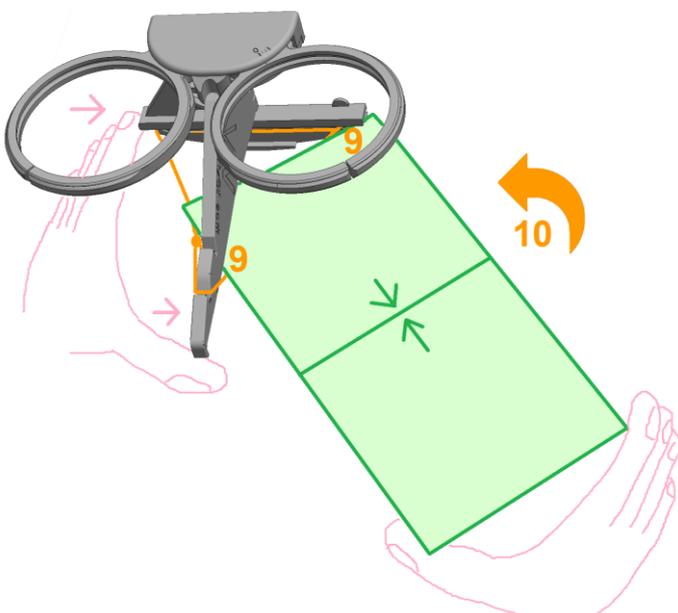

5. To mount the smartphone hold the VV® with your left hand, press the smartphone (without cover) from right in 45° angle on to the 2 rubberized edges (9) & then slide it with a 45° movement to the left (10) ...

6. ... until the display is centered (11).

In case the VV® pushes on side buttons of the smartphone, escape to the home screen or turn the phone upside down or move the phone a bit to the right/left off-center or use a phone case which surrounds the buttons.

Adjust distance between lenses (12), until the 2 images are sharp & overlap horizontally. To adjust vertical overlapping, move lower end of display-divider a bit left or right (13):

7. For handheld use:

Hold the **VV**® like on the photo using your hands as shades:

8. For head mounted use:

Slide the **VV**® into the rail (**14**) under the vizor (**15**) of the cap (separately sold) or first attach the rail with screws to another flat vizor using this stencil (blank side facing the vizor): www.virtualvizor.com/stencil

9. Step 2-6 (see above):

10. To center the lenses vertically in front of your eyes move the vizor up/down on your forehead (**16**) or bend it up/down. Then adjust the distance between eyes & **VV** (**17**):

11. For shading pull the detachable hood over the smartphone & hook it into the lower end of the display-divider (**18**) or ...

12. ... for more comfort pull it over the back of your head:

13. In case you own the gamepad press START for 1 second & connect it via Bluetooth.

14. Pause in case of eye-strain, nausea, headache or other symptoms. Minors need parental instruction & supervision.
